

IDNEXT'19

CALL FOR PRESENTATIONS

Trust in digital technology will be the Internet's next frontier

THE DIGITAL (UN)-CONFERENCE EVENT

THE HAGUE (NETHERLANDS), 25-26 SEPTEMBER 2019

IDnext event is the European (un)-conference built around the true key issues of the digital identity of both private and public organizations. It is ID user's leading network and knowledge sharing event organized in close collaboration with [SIDN](#)

The 2019 program will be content rich and feature an exclusive mix of presentations and panel discussions where existing and emerging developments related to the digital identity provides the background for un-conference, workshops, discussions and debates.

At IDnext (inter)nationally renowned experts and key players in the world of Digital IDentity will address the most relevant issues in the fields of convenience, mobility, privacy, security and much more - informing a high qualified audience on the evolution of the digital identity upon which future developments will be built. Over the different tracks of the event, catalyzed networking opportunities will bring together experts and professionals from the industry, government representatives, innovators and (pioneering) end-users. Active participation in the un-conference during the event offers unique opportunities of interaction, dissemination of knowledge and sharing experience with your peers.

The IDnext event is intended to help you and all other attendees find the time and space to talk will and learn from each other. Areas of interest for this event include, but are not limited to, the following themes:

Identity of things

An ever-ever-increasing number of devices interact in our networked online world. Things are evolving into agents that operate on behalf of humans and businesses; Artificial intelligence allows them to act autonomously. And while doing this, most of these devices are great at data-collection, logging all sorts of transactions and meta-data.

Social consumer

The developments of the consumer identity and its personal identity are rapidly evolving. Consumers wants to be in control of their (personal) data and are looking for tools to orchestrate the exchange of their own information

eCitizen

Who will provide the citizen with their digital identity? Many European solutions point to a central role of Government itself in the control and provision of digital identity. Where some governments choose to seize identity, others radically defer it to the market.

Innovation is key!

Innovation is a key strategic driver (for public and private) organizations as we enter a next decade of the digital century. Blockchain has been the synonym for innovation in the last few years. What is being delivered on that? Which other innovations should we keep an eye on?

Private eye

Regulation on privacy doesn't provide a clear-cut approach. GDPR seems to raise more questions than it clarifies. Privacy is becoming a domain and context related concept.

Trust in digital technology will be the Internet's next frontier

DEADLINE CALL FOR PRESENTATIONS: 29 MARCH, 2019

Call for Presentations

How to submit a presentation for IDnext event?

Individuals with professional experience in research, development, manufacturing, innovation, consulting, market analysis or management within companies or organizations active in the world of digital identity are INVITED to submit a presentation to the program committee for evaluation by 29th March 2019.

Contributions must be original, previously unpublished and submitted in English. Presentations will be evaluated on the basis of content, complementary value to the program, originality, topicality, relevance, clarity and the caliber of the speaker. Presentations should reflect the scope of the event. Please note that in the selection process, case histories, high-impact projects and end-user presentations will be favored.

This event aims to be an informative and substantive event; as such, commercial presentations will be rejected.

In order to be evaluated, candidates should provide the following information to speaker@idnext.eu

- Name of the speaker
- Name of the company/organization and position of speaker
- short BIO/CV (narrative form, approx. 200 words) of speaker
- portrait of speaker
- Full contact details (address, e-mail, telephone, fax) of speaker
- Title of the presentation (max. 15 words)
- Abstract of the presentation (min 250 words, max 350 words)

Acknowledgement will be provided on receipt of every presentation. If no acknowledgement has been received, please contact the organizing committee.

Requests for information and assistance on submitting a presentation should also be sent to info@idnext.eu to the organizing team.
